RE: Council Regulation (EC) No 1139/98 of 26 May 1998 Concerning the compulsory indication, on the labelling of certain foodstuffs produced from genetically modified organisms

Dear Customer

With reference to the above legislation and with consulting with our local Department of environmental Health, D.Parker & Son is able to issue the following statement-

We state, after consulting with our suppliers and the authorities that we do not knowingly sell any products known to contain genetically modified food stuffs, i.e. Soya or Maize. With the exeption of :-

Sausages and sausage products (including Stuffing mixes and sausage rolls)

Burgers and rissoles

With regards to the above exeptions there are at present moves to rectify this problem, so that in the future we will be able to state that all of our products do not contain GM additives.

As you can appreciate, with the amount of different products we supply, and the number of different suppliers used it is not possible to give a 100% guarantee.

We will of course keep abreast of the situation and confirm that we regularly ask our suppliers to audit their products for such ingredients.

Yours Sincerely,

Daniel Parker (for and on behalf of D Parker & son)
